

PUTTING THE INTERNATIONAL DRONE MARKET INTO PERSPECTIVE

“Global UAS OPS” is an **ongoing international survey on the drone operations market** [*current and near-future (1 to 2 years)*]. It targets **drone operators in all countries**. The survey is available in **English, French and Spanish**.

**Basic Principles**

- Collect factual information obtained directly from members of the international drone operator community
- Establish a perspective based on responses from qualified and quantified contributors
- Obtain high-level feedback on the experience with operational risk analysis methods
- Map and compare the market for non-military drone operations (*commercial & non-commercial*)
- Contribute to the identification of the international drone operator community
- All participants (*name of organisation & country*) will be listed in the survey result
- The results of the survey will be made available to all participants, all regulatory authorities (*national, regional, international*) & all other interested parties, and posted on [www.rps-info.com](http://www.rps-info.com)
