Working Group «Drones & UAS»

Symposium Drones & UAS in Switzerland

Unmanned Aerial System operations are increasingly becoming a part of the Swiss aerospace environment, as the use of UAS for professional activities is experiencing rapid growth and growing societal acceptance. The Swiss Aerospace Cluster aims to connect new and established stakeholders in the Swiss aerospace industry by launching the new Working Group «Drones & UAS», dedicated to focusing on developing, distributing, operating and providing services for unmanned air vehicles. On the occasion of the founding event of the working group, the SAC organizes a symposium on «Drones & UAS in Switzerland».

Registration & Further Information: office@swiss-aerospace-cluster.ch

SAC	12:00	Welcome Lunch (Working Group)
	13:00	Constitution SAC Working Group Drones & UAS
